

## 3000 Compact Quick-Change Labeler

Now packagers can switch production runs in seconds by swapping pre-loaded labeling cartridges and reengaging the system within seconds. The **3000** (patent pending) exclusive design provides the user with interchangeable compact locking heads driven by a quick change docking drive station. Downtime is reduced to seconds when changing from one job to the next. Simply disengage the locking device, pull the labeling head, place another pre-strung labeling head, and begin labeling again. Designed for labels up to 1 3/4" wide.

### Labeler:

- Heavy duty aluminum construction
- Compact labeling cartridge
- Jam-free waste rewinder
- Optical label sensor adjustable on both X and Y axis
- Adjustable web guides
- Stainless steel peel edge
- Configurable as tamp, wipe or blow-on
- Can be converted to right or left hand configuration
- User friendly electronic controls with programmable presets

### System:

- Compact labeling cartridges may be exchanged in seconds
- Labeling cartridges may be engineered to client specific label widths
- Optional product feed systems and material handling systems are available
- Optional VisuaLabel™ touchscreen control panel provides system synchronization to eliminate the need for "tweaking" the system.
